*Keeping you informed*

## Construction noise

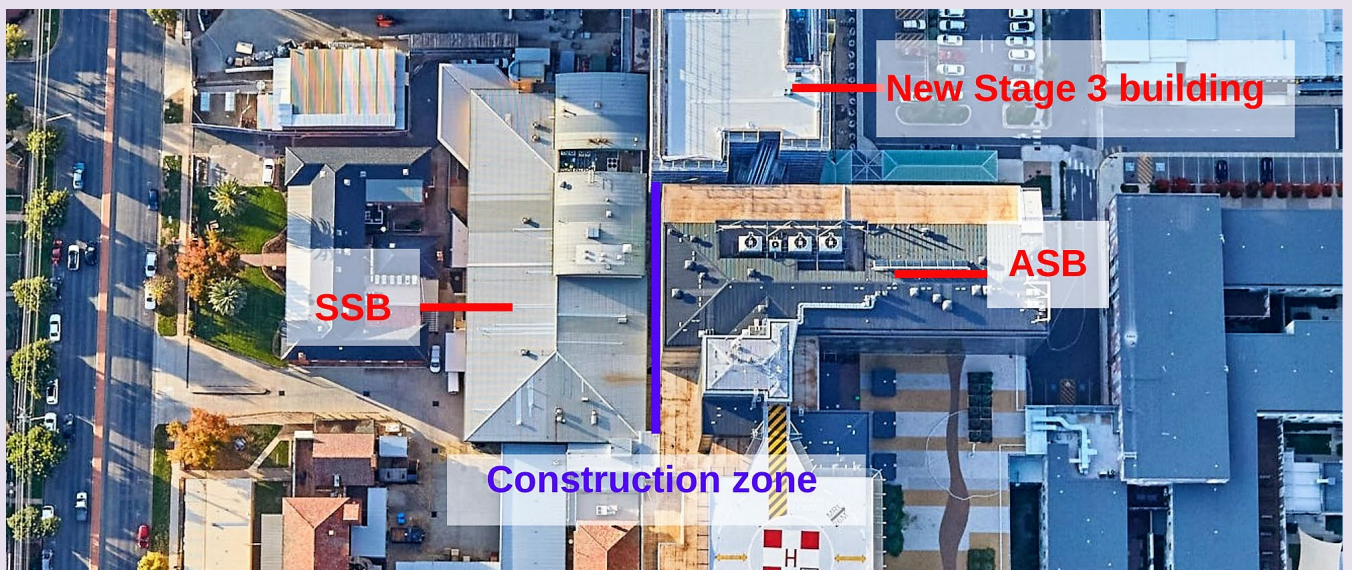

There'll be increased noise due to the construction of a link bridge between Level 1 of the new Stage 3 building and the existing acute services building.

Please be advised that this work will commence from Monday 27 July 2020. It will impact the area around a construction zone between the existing Support Services and Acute Services buildings.

The increased noise will be generated by demolition, drilling and cutting works, the erection of structural steel and the use of hand tools including rattle guns. There'll also be a reduction of natural light when the windows in the construction zone are covered.

*Thank you for your ongoing assistance*
